

Psychological and Emotional Well-being Intervention in TBI

The purpose of this study is to compare two different programs aimed at improving psychological and emotional well-being in people with moderate to severe TBI.

All sessions can be done in-person or via video conference.

Qualifying criteria for participants

- Between 18 to 70 years old
- Had a moderate to severe Traumatic Brain Injury more than 1 year ago

Participation lasts approximately 6 months. There will be 3 to 6 half a day testing visits. You will be assigned to one of the two 10-week group intervention. All testing and intervention sessions can be done in-person or via video conference. You will receive up to \$240 for your participation.
