

Research Study:

Tell us about your experiences
with rehabilitation after your
child's brain injury

The purpose of our study is to find ways to improve a measure we are creating for caregivers to report the rehabilitation services their child has used after traumatic brain injury. Our goal is for this measure to be included in future research about pediatric traumatic brain injury to better our understanding of recovery and improve treatments.

Are you Eligible?

- Primary caregiver of a child aged **0-18** years who was hospitalized for **brain injury within the last 2 years**
- Caregiver lives with child
- Caregiver age ≥ 18 years
- Caregiver speaks & reads English

Participants will
receive a \$30
Amazon gift card
for study completion

Participation

If you agree to participate in our study, we would ask you to participate in a **1-1.5 hour** Zoom interview at a time that is convenient for you. During the interview you would complete the measure and provide feedback to help our team ensure the measure is well-designed, clear, and easy to complete.
